08 PROJECTS

Dec 2022 — Feb 2023

Thane

Brain Tumor Detection

In this Machine Learning project,we built a brain tumor detection system.We used Convolutional Neural Networks (CNN) and various Python Libraries in this project.
A brain tumor detection system is a system that will predict whether the given image of the brain has a tumor or not.The doctor will take the MRI of the patient's brain and will provide the image into the system and the system will then determine whether the brain has a tumor or not.
